

WHAT IS URBAN3D?

Precast and prefab manufacturers face significant cost overruns as a result of waste, unpredicted delays, and human error.

Urban3D is a software solution that enables precast manufacturers to reduce costs by improving inventory management and tracking concrete throughout the project lifecycle.

URBAN3D in use in Germany

KEY FEATURES

Inventory tracking

Quality assurance through material traceability

Labor management tool

WHY URBAN3D

- > Lower costs via reduction in labor, waste, and disputes
- > Increased transparency & accuracy for your clients provides you with an edge over your competitors
- > Faster execution through clear end-to-end communication

HOW IT WORKS

We inspect your factory

We install our network of sensors & antennas and set up your accounts

You monitor your assets using our mobile app & web-based dashboard

INTEGRATES WITH
